

**Homework Assignment**  
**Construction Site Erosion Control**

**Modules 1 and 2 Site Planning**

Prepare the initial parts of a construction site erosion control permit application. Follow the guidelines given in the class modules. Examples of material that can be assembled include (from Module 2, pages 17 on, for example):

- a regional topographical map showing the site location and surrounding receiving waters
- a description of the planned project activities, as currently understood (schedule and phasing)
- a description of the soils for the site
- identify the moderate, high, and especially critical erosion hazards on the site (based on slope and slope length)
